Sameer Ratnakar Pawar

+91-9730746958 | sp2130ji@gmail.com | portfolio website | LinkedIn Profile

PROFILE

Data Engineer skilled in **Python**, **SQL**, **Excel**, **Apache Spark (PySpark)**, **Power BI** & **Azure Databricks**, with hands-on experience in building and optimizing data pipelines for analytics and reporting. Proficient in **ETL development**, **data visualization**, and performance tuning on cloud platforms

EDUCATION

B.Tech in computer science from **Sandip University**, Nashik, Maharashtra
With CGPA – 8.86 2022-2026

SKILLS

Language : Python , SQL

Data Analysis & visualization tools : Power BI , Google Looker Studio, Microsoft Excel

Big Data processing : Pyspark , SparkSQL , DataBricks

Database : MySQL , PostgreSQL

Cloud Platform Services (Azure) : Azure data factory , Azure Data lack gen 2 , Azure blob storage

Tools & Platforms : CI/CD piplines

EXPERIENCE

CapOasis Technology Pvt Ltd Nashik ,Maharashtra, *India*
Technical Assistance (Automation Expert) DEC 2025 – March 2026

- Managed Meta Ads leads and optimized top-of-funnel processes to improve lead tracking and conversions.
- Built WhatsApp automation workflows to streamline communication and increase lead engagement efficiency.

PROJECTS

1.Automated YouTube Data Pipeline

- **Tools & Technologies: Python, Google API, PySpark, Delta Lake, Azure Databricks, Azure Data Lake Storage (ADLS), Azure Data Factory (ADF), SQL, Power BI**
- **Built an automated data pipeline to fetch and process live YouTube metrics, reducing manual data collection effort by 80% and improving data availability speed by 60%.**
- **Transformed raw JSON data into optimized Delta Lake format using PySpark, enhancing data processing efficiency by 50% and enabling real-time visualization dashboards in Power BI.**

GitHub: github.com/yourusername/automated-youtube-pipeline

2.Lead Generation Data Pipeline (Map-Based Data Extraction)

- **Tools & Technologies: Python, APIs, JSON, PySpark, SQL, Azure Data Factory (ADF), Azure Data Lake Storage (ADLS), Azure Databricks**
- **Built an automated lead generation pipeline by extracting business data from map APIs (e.g., OpenStreetMap), reducing manual data collection effort by 85% and increasing lead acquisition speed by 70%.**
- **Transformed and cleaned raw JSON data using Python and PySpark, ensuring 60% improvement in data quality and consistency for downstream processing.**
- **Designed scalable data ingestion and loading workflows using Azure Databricks and ADLS, enabling seamless integration of processed leads into production systems for analytics and marketing use cases.**

ACHIEVEMENTS

- Earned certifications in **Cloud (Microsoft Azure, AWS)** and **Data Engineering** from *Udemy*.
- Certified in **Cloud Security Architecture** on **Azure** and **AWS** platforms.
- Secured **4th place** at the *Shegaon Hackathon*, demonstrating strong problem-solving and technical skills &
  Completed internships at **Heal Bharat** and **3SV Software Solutions**, gaining hands-on experience in **database management** and **data analysi**
