Address : Sandip University, Nashik, Maharashtra

Objective

Secure a responsible career opportunity to fully utilize my training and skills, while making a significant contribution to the success of the company.

Work experience

June 2023 — Present

- **MySQL Developer at Heal Bharat (6 months):** Worked as a MySQL developer, focusing on backend database management. Designed, optimized, and maintained relational databases for efficient data storage and retrieval, ensuring seamless integration with backend services.
- **Data Analysis and Forecasting Project:** Led a store data analysis project, working with multiple relational tables to extract key insights and trends. Implemented forecasting models to predict future sales and inventory needs. Utilized advanced Power BI features such as DAX for complex calculations and created a comprehensive dashboard to present results for data-driven decision-making.
- **Business Analytics and Data Visualization:** Proficient in Power BI, with extensive experience in creating interactive data visualizations, developing dashboards, and generating actionable insights to support business decisions.
- **DAX Queries and Data Modeling:** Expertise in writing DAX queries in Power BI for complex calculations and building efficient data models. Skilled in optimizing queries for enhanced performance and accurate reporting.
- **Database Management:** Skilled in SQL for querying and optimizing data. Experienced in designing, implementing, and maintaining relational databases, ensuring smooth data retrieval and storage.
- **Web Application Development:** Proficient in Python and Flask, with experience in building RESTful APIs, implementing user authentication, and integrating relational databases using SQL for efficient data management.
- **Object-Oriented Programming (OOP):** Strong command of OOP concepts in Python, with a solid understanding of their practical applications.
- **Projects:** Visit my GitHub and LinkedIn profiles to explore my work:
